Holden, Missouri 64040

Re: Martha Rose Chemical, Holden, Missouri - EPA Site ID: MOD980633069

Dear Ms. Scrutchfield:

On March 5, 2020, representatives of the U.S. Environmental Protection Agency collected indoor air and sub slab samples from your property as listed below. These samples were collected to evaluate vapor concentrations in indoor air and beneath your building. The contaminants associated with the ongoing site investigation include tetrachloroethene, or PCE, and trichloroethene, or TCE. The samples were submitted for laboratory analysis of volatile organic compounds, including the site-related contaminants noted above. Results from these sampling events are summarized in the table below.

Sample Results: 403 W McKissock Street, Holden, Missouri			PCE ($\mu\text{g}/\text{m}^3$)	TCE ($\mu\text{g}/\text{m}^3$)
Worker Indoor Air Additional Assessment Level			180	6
Worker Sub Slab Additional Assessment Level			5,800	200
Sample Type	Sample ID	Collection Date	PCE Result	TCE Result
Indoor Air	IA05-030520	3/5/2020	ND	ND
Sub Slab	SS06-030520	3/5/2020	ND	ND

Notes: Sample ID = Sample Identification # $\mu\text{g}/\text{m}^3$ = Micrograms per cubic meter ND = Not detected

Indoor air sample IA05-030520 collected on March 5, 2020 from on top of the sink in the center of your business indicated no detections of PCE or TCE in the indoor air.

As previously discussed, multiple rounds of sampling are anticipated to be collected and analyzed to monitor concentrations. The EPA will be contacting you regarding subsequent future sampling events.

This information is being provided to you in accordance with Section 104(e)(4)(B) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended. If you have any questions regarding the above, please contact me by phone at (913) 551-7449 or (800) 223-0425, or by e-mail at schmaedick.manuel@epa.gov. Thank you for your cooperation in this matter.

Sincerely,

Manuel Schmaedick
